

Getting Set Up with SailSys

To enter any racing series at SBSC this coming season skippers must do so via SailSys race management system. There are a few simple steps to follow to achieve this.

1. Go to <http://sailsys.com.au/> and create an account with your email and chosen password.
2. Go to the Race Entries link on the Keelboat section of the SBSC website or click [Here](#)
3. Log in using your email and password
4. Click the blue **ENTER** box for a series you wish to enter. This will step you through setting up your boat and contact details. Once your details have been completed you can enter any other series without repeating the process.
5. For fleet races you will be asked to enter as spinnaker or non-spinnaker boat. Divisions will be allocated when the series entries are processed by KB admin just before the start of the season.
6. As part of the entry process you will be required to upload your Cat 5 Safety Declaration for the 2023-24 season ([click here](#) for the form) and your current Insurance Certificate. Your entry cannot be processed without this documentation provided.
7. We are also requesting that you include your latest AMS and ORCc certificates as part of the entry process. Both these measurement certificates can now be validated.
